

SBAR – Summary for Receiving Hospital
THIS MUST BE DONE BEFORE TRANSFER

A summary for the receiving hospital must be completed and put into the medical notes (ideally via bluespinner, but otherwise directly in medical notes). Include all information below:

S ituation	Diagnosis Why are you referring?
B ackground	Presenting Condition Past Medical History Overview of Admission Events Investigations Treatments
A ssessment	Current clinical status ABCDE
R ecommendations	What needs to be done? Communications Are there scans, have they been linked? Do they need booking? Who is the accepting Clinician? Is the patient to return or stay on site?
<p>Who is the referring Critical Care Consultant? Who is the receiving Critical Care Consultant? Who transferred the patient? Full names of whole team</p>
