

Staff Support

Provided by the Cancer Psychology Service

Staff members on this ward can contact the
Cancer Psychology Service
for confidential support focused on their work

Reasons staff seek support can include:

- Psychological first aid following a traumatic event at work (focus on creating feelings of safety and methods of self-care)
- Understanding, processing or preparing for difficult interactions with patients and families
- Struggling with difficult emotions around any aspect of work
- For guidance about where to access further emotional support

In order to arrange a meeting with one of our Clinical Psychologists
email or call us on:

wah-tr.cancerpsychologyreferrals@nhs.net

01905 733602 ext. 30004

We will then arrange a convenient time and place to meet

This service is fully supported by ward and senior managers and you will be supported by being allowed time to attend an agreed meeting
